

Suggested Changes Proposed by IDEM to the Amendments to 327 IAC 5-4-3 and New Language at 327 IAC 15-15

Key:

Bold = Suggested new text

~~Strikeout~~ = Suggested deleted text

The attached document is a comparison chart showing the changes between the rule at preliminary adoption to the rule for final adoption that includes IDEM's suggested changes. The left column shows the rule language as preliminarily adopted. The right column shows the preliminarily adopted language with IDEM's suggested changes that is proposed for final adoption.

This document was prepared to give the reader a side-by-side comparison of the numerous changes and the restructuring of the rule language requested by IDEM staff and the regulated community. Because of the extent of the changes, we hope this document will prove less time-consuming and more understandable than the standard change sheet format.
